

November 11, 2020

Dear Buckeye Central Parents, Staff, and Community Members:

As our community continues to fight the spread of COVID-19, we believe one of our greatest responsibilities is to communicate transparently and often with you, our school community. It is our hope that accurate and up-to-date correspondence will help you make well-informed decisions for your family. Nothing is more important to Buckeye Central than the safety and health of our students, our employees, and their families. When we work together, we can provide the best care for all involved.

We have learned that a teacher has tested positive for COVID-19 in your child's building [middle school]. We are working closely with Crawford County Public Health to ensure all appropriate measures are being taken to identify anyone at risk due to close contact with the infected person. Should your child be identified as a close contact, you will be notified by Crawford County Public Health and/or the District that your child will need to quarantine. Being identified as a close contact means that your child was within 6 feet of an infected individual for 15 minutes or more, or had direct physical contact, such as a hug or sharing classroom space or supplies with them. If you are not notified by Crawford County Public Health and/or District, your child was not identified as a close contact and therefore does not need to quarantine.

During this time of increased community spread, we recommend that all families monitor their children for symptoms daily. Symptoms of COVID-19 include fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea. These symptoms may appear 2-14 days after an exposure. If you or a family member exhibits these symptoms, please contact your medical provider. Please stay home if you are sick, and keep your child home from school if he/she is sick.

Crawford County Public Health encourages you and your family to follow the Centers for Disease Control and Prevention (CDC) recommendations for best practices to help prevent the spread of COVID-19:

- Wash your hands often with soap and water for at least 20 seconds.
- Use alcohol-based hand sanitizer with at least 60% alcohol if soap and water are not available.
- Avoid close contact with those who are sick.
- Cover your coughs and sneezes with a tissue or your sleeve.
- Avoid touching your eyes, mouth and nose.
- Disinfect frequently touched surfaces and objects.
- Stay at home when you are sick.
- Practice social distancing, leaving at least six feet between you and other people.
- Wear a facial covering in public settings.

Preventing the spread of this virus requires the vigilance of everyone at school, at home and out in the community. As we learn more about COVID-19 the guidance changes accordingly. For current information on COVID-19, please visit <https://www.cdc.gov/coronavirus/2019-ncov/index.html>

There is nothing more important to Buckeye Central than the safety and health of our students, our staff and their families. If you have any questions or additional concerns about this matter, you are welcome to contact Beth Hiler, School Nurse, (419) 492-1022, or the respective building principal.

Sincerely,

*Mark A. Robinson*
